Open Discussion At Trustees Meeting

R. M. Greenhalgh Criticizes Chairman for Slur on Previous Board and Appointment of Relatives.

The regular monthly meeting of school trustees was held on Tuesday evening with the following present: G. Hope, chairman; R. M. Greenhalgh, W. Fraser, N. Fleming, P. Sharp, and James Ford, Secretary.

Minutes of the meetings of Feb. 16 and 18 were adopted on motion Fraser-Sharp.

Trustee Greenhalgh in referring to the minutes whereby S. B. VanDuzee was appointed to assist the secretary, asked if the secretary had been consulted concerning this. He (Greenhalgh) was absent from the meeting through illness. Past history of the Board showed that criticism and splits had been caused through trustees appointing relatives or friends, and he was opposed to the practice on principle, not for personal reasons. The three trustees elected recently had been placed in office largely because of the criticism arising from the previous chairman's son having been appointed to a position by the trustees, and the three former trustees had apparently been defeated over this issue. He also resented the slur cast upon the old board and himself by the sheet issued prior to the election, and asked the board "Was it honest?" They disclaimed having been responsible for issuing the sheet. "What did you do on your election slate?" asked Trustee Greenhalgh. "You helped to put off three men for the same thing you are now doing. Are you honest? I am fighting on the principle of the appointment."

At this point Trustee Fraser moved that discussion cease, but the motion was not put. Trustee Greenhalgh stated they had been mistaken in not consulting the secretary about the appointment as to who should work with him. Trustee Fleming remarked that Mr. Ford had made no objection at the meeting when VanDuzee was appointed to assist him, to which Secretary Ford replied that when the chairman had stated to the meet-

Funeral of Mrs. Sirak

A large number attended the funeral services of Mrs. Frank Sirak on Sunday afternoon, at Holy Ghost church, Rev. Father Dunbar conducting the service. The Slovak Society, Miners Association and many individuals were present, many being unable to gain admittance to the church. Burial was in the Roman Catholic cemetery.

Requiem Mass was sung at 9 a.m. on Saturday at the church, and prayers were said in Crows Nest funeral home on Thursday at 7.30 p.m.

Many beautiful floral tributes were sent by organizations and relatives and friends.

People's League Will Draft Program

Future activity and policy of the People's League of Alberta will virtually be decided during the present week. On Thursday and Friday it is convening the first general meeting of its 40 member executive, representative of the entire province, to discuss the general set up and potential affiliations.

From the meeting will emanate a definite program hinging on one of the more important points of the agenda, namely—"The advisability of appointing a committee to invite representatives of all political parties to meet them."

There will be a nominating committee, roads program committee, one to deal with private debt and others to consider agriculture, public finance, government economy and unemployment.

On Friday, March 5, the second day of the meeting various reports will be presented along with findings of the committees. A considerable part of the same day is reserved for discussion of "future policy of the league."

The league's representatives will be welcomed to Calgary by Mayor Andrew Davidson.

EXPLANATION

The party named Pellier as having been granted relief, reported in town council minutes, was a man employed here in various jobs, and not the man of the same name who with his family lives near the lake. The relief recipient's full name is Henry Pellier, and he is at present at Pincher Creek.

Born in Coleman—Died in Cranbrook

The funeral of Paul Ofner, Jr., was held from the MacPherson undertaking parlors here yesterday afternoon with Rev. J. F. Bell officiating. Records show that deceased was born at Coleman, Alberta, 27 years ago, and that he was a mechanic by trade. It is said his father has a ranch near Wynndel. He leaves a wife and two children. Death was due to pneumonia.—Cranbrook Courier.

Nobody Knows!

Trustee Greenhalgh brought up a pertinent point at the school board meeting when he referred to the slur cast upon himself and former trustees as well as the present chairman by a sheet circulated just prior to the election in February. None present would admit responsibility for the statements contained in it.

Leaving on Monday's train to attend the second game of the play-offs were Mrs. M. Joyce, Lewis Brown and Robt. Jenkins. R. F. Barnes left Sunday for the game.

Aberhart Admits Fountain Pen Credit Impossible

No Dividends and Asks Supporters to Advise Course to Follow—Opposition Demands Resignation.

Rumors of an impending important announcement materialized on Sunday when Premier Aberhart from his Prophetic Bible Institute admitted the impossibility of fulfilling his promises. As he will in all probability go to the Coronation of King George VI, he asked his supporters to let him know by the first week in June what they would like him to do—should he continue or resign? Those who did not vote for him are to have no part in the referendum or passing of resolutions, only members of Social Credit groups. The result might easily be foretold in taking a vote under such restrictions.

The premier opened his afternoon's address by stimulating mirth in his followers, telling them he was happy and to smile. Evidently he was trying to make the ultimate blow of "No Dividends" fall a little easier. Opposition, sickness and many other reasons were given for his failure; but as he had promised dividends in 18 months from the time of his election, he felt compelled to explain why he could not fulfil the promise.

He refrained from his customary abuse of "big shots" and political opponents and his address came to an abrupt end after the announcement which has created widespread comment, though not unexpected by those who from the time his dream was first projected have pointed out its impracticability.

Some political leaders and prominent business men point out that the usual course when a government admits failure is to go to the people to find if they still retain public confidence. This apparently Premier Aberhart has no intention of doing, and is using political strategy in appealing only to his own supporters, who at the election in August 1935 numbered approximately 52 per cent of the electorate.

LOCAL AND GENERAL

Mrs. D. Hoyle spent a couple of days in town this week, visiting Mr. Hoyle, Gilbert and Wilfred. She returned to Lethbridge Thursday afternoon.

A fine wedding picture of Mr. and Mrs. Robert Lowe (nee Maureen Cooke) was noticed in the Lethbridge Herald of Tuesday.

Miss Norma Plante, and Miss Marion Ferry of Prince George, B. C., nurses-in-training at Royal Jubilee hospital at Victoria, are spending three weeks holiday here the guests of Mr. and Mrs. Joe Plante.

H. Wilton-Clark, manager of Mohawk Bituminous Mines Ltd., and William Stevenson, general manager of Hillcrest Collieries Ltd., are in Winnipeg this week on business in connection with their companies.

Lieutenants Fitch and Frayn of the Salvation Army, accompanied by Margaret Roughhead, Doris and Mildred Griffiths, Violet Knowles and Daisy Lochrie, attended the Young People's Conference of the Salvation Army held in Calgary. They left on Friday, returning Wednesday.

Main Street Markets

are vital to every retailer. Your community is, as you know, a place where home interests, affections and ties are stronger.... where there is more leisure and relaxation.... than in bigger, more crowded centres. That is why response to advertising in your community's own weekly newspaper is so pronounced and profitable to every enterprising retailer.

Local News

Joe Fisher, injured on Saturday against Luscar, states he will be in uniform this Saturday against Dominions.

Ballyhoo and "kidding the troops" may create an impression for awhile, but it doesn't stand hard wear.

"To be or not to be" that is the question which will be decided Saturday morning at the arena as to whether or not Coleman fans will have the privilege of witnessing the last two games of the series between Canadians and Dominions.

Mike Biela, for 19 years employed by International Coal & Coke Co., who left here in 1928 for Calgary, where he purchased a pool room, is spending a week or two here visiting friends. He owns the building in which Motor Inn was established, and is endeavoring to sell the property.

Canada again reigns supreme in the amateur hockey world. Kimberley Dynamiters, representing Canada in the world's championship held at Wembley stadium, England, went through the tournament without a defeat. The third period of the Canada-Switzerland game was broadcast by the CBC on Saturday evening and fans listening in were given a play by play description of the game by an English announcer whose excited exclamations of "Oh my dear" whenever play speeded up caused many smiles. Final score was 2-1.

Canadians Win Semi-Finals Against Luscar

Will Meet Edmonton Dominions, Champions of "Big Six" League to Decide Provincial Champs.

Despite disappointment at not having one of the Canadian-Luscar series played here, the games in Calgary and Lethbridge were followed with keen interest. Coleman won two hard-fought games against the team which last year defeated them in the provincial championship finals.

The outcome of the finals to be played between Coleman and Edmonton Dominions, winner of the Big Six will be watched with the keenest interest. If there is ice here one of the games of the final provincial series will be played here.

The old Crow League is still a producer of champions. With the season still unfinished it boasts of the provincial intermediate champions, an entry in the provincial senior finals and possible winners, and Blairmore Bearcats, who swing merrily down the trail towards the Black cup finals.

At Lethbridge Monday, Canadians won their second straight game against Luscar Indians to enter the provincial final. Joyce, absent in the first game owing to a cracked rib, saw action in the second as the result of a bad shoulder injury to Fisher who crashed into a goalpost, injuring his shoulder and necessitating an x-ray picture to determine the extent of injury. Joyce was in sparkling form and scored all three goals in Canadians 3-2 win, ably supported by his team mates who fed him passes. Goal scorers in the first game were Jenkins, Fisher, Landiak and Lopichuk.

Canadians meet the winner of the Big Six on the latter's ice for the first game this Saturday and are supposed to finish the series at Coleman, the winner then leaving for Nelson where they

meet the B. C. champions.

Regardless of the loud voiced condemnation of Canadians during the past week by their supporters, they are still loyal hockey fans at heart. The reason for this statement is the fact that everyone on Main street Saturday night evidenced the greatest interest in the score at Calgary and many more sat up till 11.30 for the final result. The first question asked "Sandy" Dewar as he passed the men from the mine Saturday evening was "what's the score?" The local C.P.R. depot reported numerous enquiries were received there, and on Monday evening at the arena the score at the end of each period quickly spread through the rink.

Lethbridge Maple Leafs were much too strong for Vegreville and took the northern club three straight to win the provincial intermediate title. Lethbridge are seriously considering challenging for the provincial senior title, which is not a bad idea, although they stand no chance of winning that coveted honor.

Jack Kwamie is worthy of all the credit given him this past week. Kwamie, in the series just completed with Calgary Red Wings, scored five goals as well as playing a stellar role on defence. Jack injects a fighting spirit into his team which cannot be denied and has all his players working at top speed. Coleman players on the team showed up well and Roughhead, Brown, Fields and Kapka scored in the two games played to give the 'Cats a 12-7 advantage in the series. The games were interesting and the management should have cleared the guarantee asked by the Calgary club. A good crowd was present at the second game.

Another Boom Coming?

A warning against an impending boom must appear somewhat in the category of an anomaly to Western Canadians at the moment, yet there are not lacking signs that what might ultimately prove a real disaster is in the making on the North American continent and more than one authority is predicting it and shaking an admonitory finger.

The attitude of admonition and warning is inspired by memories of the grand orgy of 1928 and 1929 and its reflex debacle when values were wiped out overnight followed by a protracted and painful passage through the valleys of depression.

Those who profess to see another boom in the offing, and some of them are eminent and authoritative economists and statisticians, are not fearful of an era of prosperity founded upon the properly co-ordinated functions of demand and supply, of the application of sound business principles to production and distribution of needed commodities, but what they fear, and possibly with reason, is a repetition of the wild and unfounded enthusiasm which led to a mad scramble to buy stocks at fictitious prices, to a boost in the prices of commodities beyond their real value and to an unparalleled orgy of speculation, all more or less based on the desire of the participants to reap where they had not sown and to "get something for nothing."

To this spirit which raged across the continent like an unbridled prairie fire must be attributed the boom which preceded the profound collapse of the autumn of 1929 and the severity and lengthy duration of the period of penitence and suffering which ensued.

The question which is agitating the minds of exponents of safe recovery based on sound business methods is whether or not the victims of the depression from which the people are only just now emerging have remembered and will heed the lessons which this season of trial should have taught them, or are they and their successors going to one more cast all direction to the winds and again indulge in a riot of speculation and inflation leading to another depression which may be worse than ever?

Hoping for the best but fearing the worst, these authorities who are prophesying another boom, and issuing stern warnings of the ultimate consequences should their fears be realized, are basing their conclusions on the fact that large sums of accumulated money are seeking an outlet, that raw materials and finished products are required in enormous quantities to replace the ravages of decay and obsolescence of the depression era, and the superabundant optimism and fortifugeness of human nature which is so apt to make decide the parent of decision, to paraphrase a well known legend.

One of the authorities who fears the imminence of a period of over-expansion, followed by a depression so severe as perhaps "to shake civilization" is Roger W. Babson, well-known business statistician. In articles on the subject he points out that the business pendulum in the United States has swung back to normal and outlines steps which the government of that country has taken in the hope of stemming the possibility of another business cataclysm, but questions whether the brakes will hold in the event of a runaway.

Mr. Babson appropriately points out that legislative and regulatory safeguards are of doubtful value if they run counter to the mob spirit and is pinning his hope to a spiritual revival as a safety valve and effective preventive. Undoubtedly he is right in his belief that such a revival would be far more effective than any man-made laws and control measures.

But no matter how neighbors across the line or residents of Eastern Canada might yield to the lures of an inflationary boom, no matter to what extent they may succumb to a temptation to "whooop it up" again, it appears incredible that citizens of Western Canada could so soon be induced to participate, let alone aid in promoting another speculative debacle. The wounds and sores left by the last one must be too fresh and tender for that.

No, it must be assumed that Western Canadians will be content enough to feel their feet once again firmly on the ground without trying to soar on precarious wings to dangerous heights, at least for some considerable time to come.

Inverted Stomach

Rare Operation Is Performed In A Montreal Hospital

A middle-aged woman came on the way to recovery in the Montreal hospital after an operation for one of the rarest cases of "upside-down stomach" in medical history.

Doctors said the 51-year-old spinster, whose name was withheld, seemed to be progressing favorably toward normal physical condition following the 2½ hour operation that restored her stomach to its right position and corrected the position of her heart, which had been pushed far over to the right side of her body.

What made the case an extreme rarity, hospital authorities said, was the fact that the inverted stomach apparently developed in an otherwise normal adult. Babies are sometimes born with upside-down stomachs, but the medical men declared the occurrence of such a condition in a healthy adult was "most unusual." There have been only 12 examples known to medical science.

The surgeon in charge said the stomach certainly had turned over in the last eight years, and most likely within the last year. Last August, the patient suffered a fall, and it was believed an outgrowth of that.

New Field Crops Valuable

With an average yield of 9.1 bushels at an average price of 87 cents, the 7,500,000 acres of Alberta farm land sown to wheat last year produced 67,000,000 bushels with a total return of \$58,290,000. Comparative newcomers to Alberta's field crops, peas and beans topped everything in sight at an average of \$1.50 a bushel.

Mount Rainier's glacier system greatly exceeds that of any other peak in the United States. Twenty-eight rivers of ice creep down its sides throughout the year.

How To Overcome Piles And Rectal Soreness

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. The itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemorrhoid and use as directed. This form of treatment is instantly, quickly relieves the itching and soreness and aids in healing the soreness. Hemorrhoid is a physician's prescription and is highly recommended. It is easy to use and it means the height of relief for anyone to risk an operation, when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

Made Radio History

Madame Chiang Kai-Shek Broadcasts Address In Faultless English

Madame Chiang Kai-Shek, China's "first lady", made radio history as the first Chinese woman to address a world-wide audience.

She spoke in faultless English from her home in commemoration of the third anniversary of China's "new life" movement—a plan she launched with Generalissimo Chiang Kai-Shek, her husband and China's political leader for a moral reawakening of the country.

China's "warlord era, with its attendant civil strife," she declared, "is nearing an end because public opinion opposes those who want to settle differences with the sword. National unity is here because the people demand it."

For a decade Generalissimo Chiang Kai-Shek devoted himself to unifying scattered armed forces into a national army. Now he is seeking economic advancement.

She stated highways were the chief factor in the economic progress of China and said motor buses now were busy in every province.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning!

The liver should pour out 100 pounds of fluid bile into your bowels daily. If this bile is not poured out, it is stored in the liver and it just decays in the bowels. Gas builds up your stomach. You get constipated. Hard stools go into the bowels, and you feel wear, sink and the liver works harder. A more honest movement doesn't always get at the cause. You must work on the liver as well. It takes three good, old, Carter's Little Liver Pills to get the bile flowing freely and make you jump out of bed in the morning. They do the work of the liver. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else, etc.

France's Declining Birth Rate

Population Has Been Increased By Advent Of Foreigners

The annual number of births in France reached its maximum toward the end of the Second Empire, when it was as high as 1,024,000 in 1868. In 1934 it had fallen to 677,000 and in 1935 to about 650,000, of which nearly 50,000 were the children of foreigners. The birth rate has therefore diminished by 384,000, or nearly a third, although the population has increased since 1868 by three million immigrants or naturalized persons, which has resulted in increasing the population from 35 to 45 million inhabitants. During the period 1900-35, the birth rate has decreased by nearly 100,000. The number of births per marriage had decreased even more rapidly. In 1860 the average number of children born to a woman per marriage, at the end of last century it was 3, today only 2.2, or a diminution of about 50 per cent.—From Nature.

Self Preservation

Toronto Physician Says Average Man Does Not Take Proper Care Of His Health

While golf is the finest game for men between 25 and 50; badminton is insane for every man over 40, unless he has been an athlete all his life. Dr. C. O. Young, the president of the Optimist Club of Toronto at their weekly luncheon at the Royal York hotel.

Dr. Young said the average businessman to-day took far more care of his automobile than he did of himself.

"Too many of us," Dr. Young continued, "who come home after a heavy day at the office get into a heated bridge game, smoke too much, or perhaps take one drink too many, and the next day we start with a headache. It is all due to a nervous tension."

In his opinion, Dr. Young added, poker was far more relaxing than bridge.

Egyptian Mummies

Pharaohs Of Ancient Egypt May Be Returned To Original Tombs

The fate of the Pharaohs of ancient Egypt is being considered by the Egyptian Government and the shrewd mummies of the kings, now in the Cairo Museum, may be returned to their tombs. Experts are unanimous that the climate of this city is too damp for mummies. Replacing the mummies in their original resting places in the famous Valley of the Kings is considered the happiest solution of the problem.

The British Museum of London is said to have the world's largest collection of coins and medals. There are more than 500,000 pieces in the collection, the oldest having been made about 700 B.C.

The United Kingdom consumes six times as much tea as it does coffee.

"BIG BEN GOES FURTHER BECAUSE EVERY CHEW LASTS LONGER!"

BIG BEN

THE PERFECT
Chewing Tobacco

The Primary Producer

Chemist Believes Farmer Holds Solution To Surplus Problem

Motor fuel will provide the solution to Canada's problem of surplus agricultural products, Dr. J. Allan Harris, research chemist, at the University of British Columbia, believes.

Motor fuel made from grain, potatoes, apples, pears, cherries and strawberries he placed in the key position. Next he predicted building materials, rayon and lacquer made from hay and straw. Artichokes and dahlias would produce sugar.

A blend of only 10 per cent would account for 50,000,000 gallons of alcohol and remove 25,000,000 bushels of grain each year from the annual surplus, the professor said. In addition to the above mentioned alcohol can be distilled from any surplus agricultural product.

With a reference to dwindling exports the young scientist observed that "even if everybody stuffed themselves the collective sustenance of the world are not large enough to absorb all the farm products of to-day."

Scientists look upon the farmer as a primary producer, not only in the first commodity of life, food, but in the first phase of industry, raw materials, he said. With decreasing natural resource, they expect agriculture to produce the bases of practically everything.

SELECTED RECIPES

SPICE BREAD

Temperature: 350 degrees F. Time: 35 minutes.
1 cup shortening; 1½ cups brown sugar; 2 cups Royal Household flour; 1 teaspoon baking soda; 2 teaspoons baking powder; 1½ cups milk; 2 teaspoons cinnamon; 1 teaspoon nutmeg; ¼ cup sour milk; ¼ cup chopped walnuts; 1½ cups raisins; 2 eggs.

Cream the shortening and gradually add the brown sugar which has been sifted. Sift together five or six times the flour, soda, baking powder, salt, cinnamon and nutmeg. Add alternately with the sour milk to the first mixture. Add finely chopped nuts and raisins which have been dredged with flour. Bake 35 minutes in a moderate oven in a pan 9"x12" which has been lined with parchment paper. Use with caramel icing No. 1.

CARAMEL ICING No. 1
1 cup brown sugar; 1 tablespoon butter; ¼ cup cream; 1 tablespoon coffee; icing sugar.

Mix together the brown sugar, butter and cream in a frying pan. Stir until sugar is dissolved and bring to rapid boil. Boil two minutes exactly from the time the whole mixture breaks into a boil. Remove from heat and add 1 tablespoon strong coffee. Beat in sifted icing sugar until mixture will spread easily.

Recipe by Mildred Mac MacKenzie Copyright.

JELLIED SANDWICH SALAD

1 cup boiling water
1 Lemon jelly powder
½ cup Crown Brand Corn Syrup
½ cup mild vinegar
1 teaspoon salt
½ teaspoon pepper
2 tablespoons chopped pimento
1 cup chopped cabbage
1 cup chopped celery
½ cup peas
2 cups shrimps, or chopped cooked ham.

Method: Pour boiling water over jelly powder and stir until dissolved. Add Crown Brand Corn Syrup, vinegar, salt and pepper. Let mixture partially set; add vegetables and mix well. Pour one-half mixture into a 9"x12" pan; add sliced shrimps or ham. Cover with remaining half of vegetable mixture. Let stand until firm; unmold on a bed of lettuce and serve with Mazola dressing.

Mrs. Lucy Dudman, who has just completed 50 years as caretaker at St. Peter's church, Wiltshire, England, has during that time also been clerk, bellringer, vergor, stoker and response leader at funerals.

Fine, delicate furniture should not be kept near windows, radiators, or any place where sudden changes in humidity and temperature occur.

Study Evolution Theory

Scientists To Make Home With Apes In Jingles Of Siam

In hopes of catching a glimpse of man in the making, seven American scientists will make their home for the next nine months with the anthropoid apes in the jungles of Siam, Borneo and Sumatra to make close observations of the life, habits and behavior of the subhuman species in their natural environment. It is announced by Harvard University.

The expedition, which aims to fill in some of the important gaps in the jigsaw of human evolution, will include learned scientists.

The scientists believe that by observing man's immediate ancestors as they live in groups in their native habitats they may obtain living evidence of man in the process of evolution at a stage millions of years before he finally emerged. It is hoped to find missing links in both the physical and cultural aspects of man's slow evolution from ape to man-ape, ape-man and finally man.

Film British Fleet

Manoeuvres Of The British Home And Mediterranean Fleets To Be Shown

For the first time manoeuvres of the British home and Mediterranean fleets are to be made the subject of a film which, it is understood, will eventually be released to the public. The film will be essentially "documentary" in character, but will have a theme. This will concern the adventures of two boys who join the navy, from the moment they put on their uniforms until they find themselves under active service conditions, as shown in the manoeuvres.

The producer is Commander J. L. F. Hunt. He was the captain of the submarine in "Men Like These" and directed "White Ensign". There are to be four cameras with the "Red" fleet and four with the "Blue" during the manoeuvres.

A Valuable Tablecloth

Has First Sketch Of London Tower Bridge On It

Has your tablecloth a sketch of the London Tower Bridge on it? If it has then send it to the City of London Corporation. When the plans for the bridge were being considered Sir Horace Jones, the city architect, sketched his idea on a blotting-paper. Later in the day he went to a banquet and elaborated the idea by sketching it on the tablecloth. The blotting-paper which bears the first sketch of Tower Bridge is now preserved in the Guildhall. The tablecloth, too, was preserved, though what has become of it is a mystery. Now the Corporation is looking for the tablecloth, which was used at a banquet in 1877.

Empire Defence

Says Each Dominion Should Realize Its Own Responsibilities

Each Dominion should realize its own Imperial responsibilities, and the defence of an Empire scattered over the world should not devolve upon a small Island, Leopold Amery, former Dominions Secretary, declared in a speech supporting the Government's defence program.

He said he refused to subscribe to the belief that rearmament meant war and declared it was a great mistake to regard the defence measures as directed against Germany. "When everyone else is putting their treasures into iron vessels can we afford continually to keep ours in brittle, earthenware jars?" he asked.

Still Wants His Well

Farmer J. Berg, of Dollard, Saskatchewan, started to dig a well but found he had a coal mine instead on his farm near there, 175 miles southwest of Regina. The seam is three feet wide and of unknown depth. But Berg is still looking for water.

In Bolivia natives wear hats made from tree bark which is soaked in water and then beaten until pliable.

Small holes in linoleum can be patched with liquid glue and finely chipped cork.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tasty for a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-cut folded carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Alberta's Premier Asks Judgment of Followers As To The Future

Calgary. The fate of the Alberta government was entrusted Sunday to the men and women of Alberta who, elected it, the first Social Credit administration in the world, in 1935. Premier Aberhart asked his constituency organizations to advise him whether he should resign or carry on.

From the pulpit of the Calgary Prophetic Bible Institute, Premier William Aberhart admitted his failure to establish Social Credit in Alberta in the 18-month time limit he set in the election campaign. He asked the judgment of his constituency organizations to advise him whether he should resign or carry on his efforts toward establishment of a new economic order. He decided not to advise from political opponents.

In the meantime, the Aberhart administration will carry on until the men and women who elected it have expressed their wishes. The premier suggested no association votes be taken until the first week in June although he would welcome expressions of opinion any time.

"May I assure you we are not throwing up our hands," the premier cautioned his supporters. He impressed them he had no intention of resigning unless the people desired a change, either in leadership or party.

"We are more and more convinced," he said, "that the new economic order can only be introduced by constant and gradual pressure until our people realize its true worth and full value. We still are anxious to continue our endeavors and you can be assured of honest government."

Meanwhile, the government was pushing ahead, Mr. Aberhart said, and this was no time for "lukewarmness and half-heartedness." Legislation to take the "final moves for further action" would be presented at the present session of the legislature. One of the reasons why he suggested the vote of his supporters be delayed until June was to give them the opportunity to see this legislation enacted.

The premier said many "strange rumors and odd tales" had been flying around for the past few days about his possible resignation. He could say definitely he was not resigning.

"At the time of the provincial election in Alberta, previous to August, 1935," Mr. Aberhart said, "I made you a definite promise. I made it not for the purpose of gaining your support but for the reason that I wanted to give you definite assurance that you would be making no mistake in having your confidence. That you did spendly."

"Now I believe that a promise is a contract that should be fulfilled if at all possible and it is my intention to fulfill my promise to-day."

"I promised our supporters faithfully that in 18 months I would try to establish Social Credit in Alberta and if, for some reason, I was unable to do so I would tell them."

frankly and leave the matter in their hands whether I should continue my efforts further or resign.

"Tuesday, March 2, the 18 months will have passed and, as you know, in spite of all our efforts, we have been unable to introduce Social Credit as we had hoped. Probably the reasons for our failure are more or less evident to you. Conditions were somewhat worse than we had expected. Opponents and blocking tactics have been even more determined than we had anticipated, sickness, resignations and other causes have disturbed our planning."

"However, be that as it may, the fact remains we are unable to accomplish what we had hoped in the time stated."

Home Improvement Plan

Approve Principle Of No Increased Taxation On Improvements

Ottawa. The national employment commission announced that the majority of provincial governments have indicated approval of the principle residential property assessments should not be increased because of ordinary home improvements under the home improvement plan or others of similar character done without its aid.

Arthur B. Purvis, commission chairman, sent letters to all provincial premiers stating success of the H.I.P. depended to some extent on recognition of the principle. He suggested certain lines of possible assistance which provincial governments might follow to ensure such home improvements be not used as bases for increased taxation.

Ontario, New Brunswick, Saskatchewan, Manitoba and British Columbia sent favorable replies while the other provinces have not signified their intention.

New Airdromes Planned

Cost Provided For In Estimates For National Defence

Ottawa. Establishment of three airdromes was provided for in the national defence vote for air services considered in the House of Commons, Defence Minister Ian MacKenzie said. One airdrome would be in Dartmouth, N.S., and the others at points not yet decided upon. At least one would be on Vancouver Island. It was proposed to bring the total strength of the air force, permanent and non-permanent, to 513 officers and 2,444 men. Of these the permanent force would include 195 officers and 1,498 airmen.

Bravo Boy Rewarded

Toronto. John Kent, 14-year-old Chatham boy who risked his life February 9 in a futile effort to save the life of his dog, Snooty, from the Thames river, is to get a new dog. The Toronto Humane Society thinks so highly of John's rescue effort it is going to present him with a thoroughly wire-haired fox terrier and a medal.

Test For Dog Racers

Eight Teams Will Compete In Farthest North Mushing Classic

Cameron Bay, Great Bear Lake, N.W.T. Indian trappers, prospectors, mine managers and Royal Canadian Mounted Police who live along the coast-line of Great Bear Lake prepared for the inaugural running of the Arctic dog derby.

At least eight teams will compete in the new and farthest north mushing classic over a 15-mile course on the ice of Great Bear. The start will be at the Eldorado mine and a residence rule bars dogs domiciled more than 50 miles south of the Arctic Circle.

Because of hard trails, glare and unimproved ice, experts call the course one of the most grueling tests of dog racing.

Among the contestants will be a 15-year-old Japanese boy named Morimoto, only known member of his race living in the Northwest Territories.

Morimoto is an experienced driver, engaged in driving prospectors on swings around the coast. He runs seven Huskies.

Shell Hits British Ship

Spanish Anti-Aircraft Shell Falls On Battleship Royal Oak

London. Explosion of a Spanish anti-aircraft shell square on the quarterdeck of the British battleship Royal Oak injured four officers and a seaman and aroused some concern lest other such "incidents" mar a six-power neutrality patrol of the Iberian peninsula.

The shell apparently came from a Spanish anti-aircraft gun which was firing on the attacking planes. Captain T. B. Drew, three other officers and one seaman aboard the Royal Oak were slightly hurt by shell splinters. None, it was announced, was "incapacitated."

Later the battleship put out to sea. Authorized sources said the government contemplated no protest, since the incident, technically speaking, was "more or less an act of God." They explained the Royal Oak was lying just outside Valencia harbor, and that there was, obviously, no Spanish intention to damage it.

U.S. Dust Problem

Dust Bowl Spreading Rapidly Across The Country

Oklahoma City. Agriculturists marshalled here for a war against crop-killing wind erosion were told the "dust bowl" is spreading swiftly across the United States southwest, creeping eastward in Oklahoma at the rate of 30 miles a year.

Gonaves were prepared to ask the federal government for aid because "the dust problem is too big for any one state to handle."

At Manhattan, Kas. Harry Umberger, Kansas State college extension director, termed "absurd" any suggestion that dust had destroyed the southwest's wheat-producing area.

Julian Tarrant, planning board erosion expert, said "7,000,000 acres of western Oklahoma land now is damaged seriously by wind erosion." He said that in 1935 about 2,000,000 acres were "completely ruined by the dust."

VISITS UNITED STATES

The recent visit to the United States of Walter Runciman, President of the British Board of Trade in connection with the long-pending trade agreement between the United States and Great Britain caused considerable interest.

Execute Ethiopian Leader

Son-in-Law Of Emperor Haile Selassie Slain By Italians

Rome. Relief and rejoicing swept Italy in the aftermath of capture and execution of Ras Desta Denu, son-in-law and "last hope" of Emperor Haile Selassie.

Desta was tracked down in the region west of the southern Ethiopian lakes, his last column decimated and his sub-chieftains "liquidated." Taken with a few of his men, he was "turned immediately over to the firing squad," Viceroy Rodolfo Graziani informed Premier Mussolini.

Most newspapers devoted their front pages to the Desta's capture, for his activities and the bomb-throwing attempt on Graziani's life and instigated a feeling of uncertainty as to whether Ethiopia was "nine-tenths conquered," as officials insist.

Viceroy Graziani, proclaiming the Desta capture as removing the last vestiges of organized resistance to Italian rule of Ethiopia, reported the chieftain had been taken.

Before that, the viceroy related, every effort had been made to get Desta to come over peacefully.

Ethiopians Executed

Strong Arm Methods Used To Quell Anti-Italian Outbreaks

Rome. Machine-gun outposts were strengthened at the Ethiopian city of Dessey to guard against further anti-Italian outbreaks while executions of Ethiopians found with arms continued apace in Addis Ababa.

The precautionary measures were taken in the face of assertions by Italian colonial officials the Fascists were undisputed masters of the Dessey region. They claimed, in fact, nine-tenths of Ethiopia was in Italy's grip and that she was rapidly occupying the remaining tenth.

Officials admitted, however, a column of 3,000 Ethiopians under Ras Desta Denu-Haile Selassie's son-in-law had staged an attempt to drive the Italians out of Addis Ababa and had been defeated two or three days' march from the city.

Peace Of Europe Is Price Set For Return Of German Colonies

London. Great Britain set the guaranteed peace of Europe as the price for any consideration of Germany's request for return of former colonies, informed sources said.

Anthony Eden, foreign secretary, was declared by diplomatic sources to have stipulated the terms in a conversation with the German ambassador, Joachim von Ribbentrop, expected to leave for Germany to report to Reich-Chancellor Hitler.

Before Great Britain could consider returning the reich's colonies or yielding League of Nations mandates over former German overseas possessions, diplomatic sources said Eden insisted the security of Europe must be established by a general accord.

The conference was said to have turned to a careful analysis of the state of affairs in Europe generally

and the possibility of concluding an effective security pact.

One of the chief stumbling blocks, well-informed sources pointed out, has been Germany's unwillingness to join a pact including Soviet Russia and Czechoslovakia in eastern Europe, despite the desire both of France and Britain that any security treaty must be all-embracing.

The coincidence of the conference and the departure of a Belgian mission to Italy under the leadership of Count Charles de Broqueville, former premier of Belgium, was seen in some quarters as evidence of renewed efforts to reach a western security agreement to replace the discarded Locarno treaty.

The Broqueville mission went to Rome ostensibly to convey King Leopold's congratulations on the birth of a first son to Crown Prince Umberto.

Loyal To King George

Indian Princes Declare Fealty At Meeting Of Chamber

New Delhi. The Chamber of Princes decided to send King George VI a "profession of profound and steadfast loyalty to his person and the throne from all the ruling princes and chiefs of India."

Meeting to discuss the proposed all-India federation, the Chamber was addressed for the first time by the new viceroy, the Marquess of Linlithgow, who said he was encouraged by the response of the princes to his efforts to assist them to reach a decision on the proposed federation as soon as possible.

He admitted that conversations between his emissaries and the princes had thrown new light on many sides of the federation question but hoped that in the not distant future satisfactory conclusions could be reached. He stressed the importance of early decisions.

Protest From Postmen

Ottawa. Protest against mail deliveries on Saturday afternoon and statutory holidays was made by the Canadian Postal Employees' Association during the annual convention at Ottawa. The association also will ask for a return to the working hour schedule in effect until 1932. Prior to that date employees on nights worked seven hours.

Finance Minister Sees Balanced Budget In Sight For Next Year

Ottawa. The goal of a balanced budget in sight, Hon. C. A. Dunning submitted his annual financial statement and relied on the present tax structure to carry him through another year.

It was Mr. Dunning's third budget and he predicted a deficit next year of \$35,000,000 with the prospect of a balanced budget the following year. His prediction was based on reduction in the deficit from \$159,000,000 last year to \$87,000,000 this year.

Government employees throughout the country learned the depression was over for them. Mr. Dunning announced the five per cent deduction from civil servants' salaries would be restored from April 1, the start of the new fiscal year. At first the deduction was 10 per cent but it was partly restored a year or two ago.

Throughout his three-hour speech, Mr. Dunning stressed satisfaction with improving economic conditions, expanding government revenues and mounting trade, but warned the problems created by the depression were still unsolved and new problems due to prosperity might be on the horizon.

Canada secured continued free entry into the United Kingdom on the products previously free, reductions in duty on silk stockings and guarantee against increase on motor cars. Concessions on bacon, cattle and beef, lumber, and other products provided in the former treaty are continuing.

Changes made in the Canadian tariff, the minister said, constitute the most extensive downward revision of duties on United Kingdom products since the inception of the British preference.

An important tariff change: outside the treaty provides for free entry of small personal gifts from all countries. Violins and other stringed musical instruments more than 100 years old will also be admitted free of duty.

A new trade agreement with the United Kingdom provided the majority of the tariff changes in the budget. There were a few reductions and still fewer increases apart from the agreement which provided reduction on a wide range of articles under the British preferential rates.

The tax structure, however, remains unchanged for another year. Income, excise, sales and other levies remain at the levels fixed last year. The budget was the first since the beginning of the depression which has not contained some increase in taxation. The only changes are a few minor additions to the list of articles exempt from sales tax.

A year ago Mr. Dunning budgeted for a deficit of \$100,000,000 and he took pride in the fact it was down to \$87,000,000. A year ago, he said, he hoped he would be able this year to plan for a deficit of \$50,000,000 in 1937-38 and a balanced budget the following year.

In view of the good showing in the present year, however, he felt safe in predicting total revenue of \$485,000,000 and total expenditures of \$520,000,000 for the coming year, a deficit of \$35,000,000. This would leave the cherished goal of a balanced budget within easy striking distance for 1938-39.

Mr. Dunning said he would be greatly disappointed if the deficit next year were not less than the deficit of the Canadian National Railways, which must be met by the treasury.

Britain Hopes To See End Of The Armament Race

London. Neville Chamberlain, chancellor of the exchequer, in the House of Commons expressed his abhorrence of the business of rearmament by nations which more profitably might pursue peace.

"Even now," he said in moving second reading of the defence loans bill, "although the prospect may seem discouraging, I do not altogether despair of presently finding some new field in which fresh contact may be made, which would avoid the necessity of pursuit of this folly to the bitter end."

"Meantime we cannot afford to stay our hand until we are satisfied we have provided for the safety of the country and have put ourselves in a position to fulfil international obligations."

He declared the opposition had no grounds for the accusation that they did not know of the relations between the armament program and foreign policy.

As to charges the government was not preventing the skyrocketing of metal prices, the chancellor declared no phase of defence had received more attention.

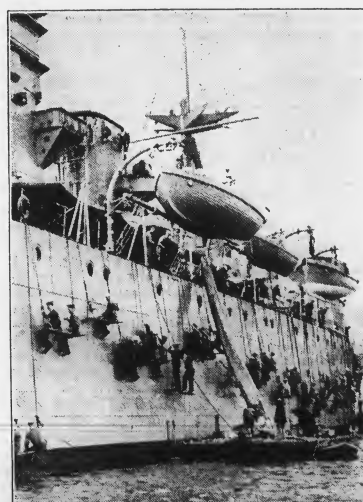

Chamberlain said he doubted whether sufficient consideration had been given to the fact that in the last six years the government had built up its credit until it was "so solidly based that we can do without borrowing on a far larger scale than anything we contemplate."

Comparing the United Kingdom with the United States, the chancellor declared that in the United States "during the last six years the national debt increased by a sum exceeding \$2,000,000,000."

"Nothing comparable to that burden has been imposed on us although it is true we have repeatedly suspended operation of the sinking fund," he went on. "I would remind the house that in three years, between 1933 and 1936, we have had realized surpluses amounting to more than \$40,000,000 in addition to the amount of debt redemption, which is the fixed debt charge of \$32,500,000."

"The net income of this country is not less than \$1,000,000,000. Surely that light, the figure of \$1,500,000 alone, to be spent over five years, cannot really be supposed seriously as likely to upset our economy."

PAINTING THE FLEET

The sailors with the British Home Fleet at Algiers know that Spring is here, because they have started to spring-clean. This picture, very much suggestive of flies around a jam pot, shows some of the boys on the H.M.S. Rodney giving the ship a new coat of paint.

Weekly Newspapers Association and Alberta Div. C.W.N.A.

THURSDAY, MARCH 4, 1937.

NOTES AND COMMENTS

ACKNOWLEDGMENT by Premier Aberhart of the impossibility of fulfilling his promises, though not unexpected by those who from the first regarded his proposals as a flight of fantasy, must be a disappointment to those who implicitly believed that increased purchasing power was to be provided through Social Credit. Wealth can only come from production, not from book entries with a fountain pen and velocity dollars issued in the form of Prosperity Certificates.

THE PREMIER frankly stated he was unable to accomplish what he had hoped in the time stated. He has found that Alberta cannot be a law unto itself and still conform to the constitution of Canada. The legislation hastily put through regarding debts, interest, Social Credit houses, the issuing of Prosperity Certificates has proved useless, which demonstrates the amateurish and ill-advised attempts to flaunt fundamental principles of honor and integrity which must be observed, particularly by governments, if chaos and revolution are to be avoided.

THE IMPRACTICAL ideas of many of the Social Credit members, and their subjugation to everything the premier proposed, combined with the admission of failure during Sunday's broadcast from the Prophetic Bible Institute, will convince people that the present government has not the business ability to extricate the province from the difficulties which it has created. There must be leaders selected to restore a greater measure of stability than has existed for two years. The lesson must be impressed on people that production alone is the source of wealth and prosperity.

PARTY POLITICS it has been suggested should be dropped in trying to re-establish Alberta's credit. For that reason The People's League of Alberta has been organized and the deliberations of the meeting of the provisional executive now being held in Calgary will be awaited with interest. There is both strength and weakness in a democratic form of government, yet nobody would think of surrendering its liberties. The weakness is that emotional appeal will sometimes carry a leader into office regardless of his practical ability to solve financial and business problems. Alberta's experience proves it. Yet on the other hand it guards against dictatorship, for British peoples will quickly turn on any leader whom they find is attempting a policy of coercion.

IF THE People's League can form a coalition of political parties and select leaders who will formulate a constructive policy to stabilize conditions and restore confidence in our own people and among those in other provinces, it will perform useful service. Conditions cannot be permitted to drift as they have since the present government took office, stirring up hostility and dividing the people into two factions. However, to still enable him to retain office, the premier is asking for a vote from all Social Credit supporters by the first week in June, presumably to enable him to carry on despite the breakdown of his plan. With an overwhelming majority in the legislature, and a predicted favorable vote from the constituency organizations, he may carry on for the full term of five years. On the other hand public confidence may become so shaken even among Social Crediters, it may compel the government to resign. Anything may happen.

WHEN YOU'VE money in your pocket you quickly forget that you were once poor, and the pangs of hunger are soon forgotten when your stomach is full. Speculation in oil and mining stocks is very active, and the collapse of 1929 and the subsequent depression have faded into the background. A new army of speculators and "suckers" has arrived, and a timely warning was recently issued by Finance Minister Dunning, especially to those who can least afford to speculate, and whom a collapse of speculative values hits hardest. If you have more money than you need to live on and provide for old age, then please yourself if you take a chance to lose it. But for people depending on wages and salaries, there are too many risks. There are still some very sharp people looking for easy money.

AN INSTANCE of the loss occasioned by blocked highways is shown in just one service station in Coleman. In February 1936 there was sold 2,000 gallons of gasoline; in February 1937 it dropped to 500 gallons. At 7c tax per gallon, a loss of \$105 is shown. Besides, truck drivers were unable to work and certain lines of business came to a standstill. Multiply the figures of one service station throughout southern Alberta, and it will be seen that the government was out thousands of dollars in gasoline tax. Would it not pay to have adequate snow clearing equipment?

Open Discussion At Trustees Meeting

(Continued from Page 1)

ing that the Board was going to run the show from the janitors to the secretary-treasurer, he had said nothing. However, past boards had never complained of his having kicked over the traces, and he felt that if anyone was to go into his office as assistant, he should be consulted, as he was under bond and was solely responsible to the ratepayers and the Board.

Trustee Greenhalgh also referred to the reflection cast on the item of sundries which the former board had been criticized for, and produced figures comparing the 1935 and 1936 figures, which showed that after deducting the court costs of the Fleming case and rent for K. P. hall class room, there was little difference. "Let's be fair and stick to the truth. We are up against the same trouble as before in regard to relatives," said Mr. Greenhalgh.

The discussion continued for an hour, with the result that it was agreed that Mr. VanDuzee should be given a section of the assessment to attend to, and that office quarters be provided for him in the school during the time he was on the work. Trustee Fraser stated he wanted to have the assessment done right by a capable man, and was even agreeable to rescinding the motion appointing VanDuzee if the Board believed it necessary to engage an experienced man. During the discussion it was stated that over \$100,000 in improvements had been added to the district since the previous assessment.

Chairman Hope suggested the secretary be given three months leave to regain his health. Secretary Ford stated he preferred to have a girl in the office as it was not necessary to engage a man to attend to enquiries while he was absent on other duties, and would not cost as much.

Mr. Ford stated he had been granted his annual holidays by the council to take effect during this month, and asked the trustees to consent to his annual leave being given now. The council had agreed that he engage a girl in the office and had suggested that if the school trustees would pay half the cost, she could carry on for the secretary. On motion of Fraser-Greenhalgh, it was agreed that the board join with the council in granting Mr. Ford leave. Trustee Greenhalgh stated that the secretary had served the town well and should be supported at this time, Chairman Hope agreeing, and stating he was agreeable to longer leave if necessary. Trustee Sharp reporting for the Works and Property committee stated arrangements had been made with Contractor D'Appolonia to sand the auditorium floor and make two clothes stands for \$90. A tape measure had been sold by the committee for \$5.00. The report was approved.

Contractor D'Appolonia in a letter stated he was ready to turn the new building over to the Board, though certain work of a minor nature would not be completed till weather conditions permitted, such as painting and plastering of a part of the interior. He also had turned over the keys. He also urged that the temperature be not allowed to go below freezing till the spring weather came. He thanked the old and the new board for their interest, especially the former chairman, Mr. A. Reid, for his daily visits during construction.

Trustees Sharp and Greenhalgh stated that before the Board took over responsibility of the school, the contractor should maintain heat and complete the work as specified in

Continued on next page

Work Must Be Found

Through jobs men and women are insured against privation and kept off relief. Jobs enable them to hold up their heads among their fellow-beings, to be self-supporting, to maintain homes, to educate and raise families.

With the exception of Alberta, the Dominion has made substantial progress in the past year in the matter of increased employment. In fact, 60,000 jobs have been made available to Canadians in 11 months, or thereabouts. On every hand—with the exception of Alberta—there is a definite upward swing in the employment pendulum.

What is our situation here? According to statistics issued for the week of December 12, 1936, Alberta had 2,694 more jobs less than for the same week of 1935.

The fact is that the present policy of debt repudiation has not increased employment, but has increased unemployment. If our men and women are to be found jobs, as men and women are finding jobs in other provinces of the Dominion, the credit of Alberta must be restored.

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The eighth statement in this series will be published in two weeks)

"Did you mark that place where the fishing was so good?"
"Yes, I put an X on the side of the boat."
"That's silly. What if we should get another boat?"—Grit.

Local News

Mrs. McCallum of New Dayton is visiting her daughter, Mrs. L. Lindoe.

Teachers from Hillcrest, Bellevue, Blairmore and Coleman met Wednesday evening and organized a Crows Nest Pass District Local Association, to deal with all questions arising in the teaching profession in the Pass.

After almost completing a round trip to Mexico and return, Dr. and Mrs. McLean were stalled within a few miles of Coleman last Saturday when the battery dropped through the floor boards of their car. A car from Sentinel Motors went out to help them in.

Open Discussion Trustees Meet'g.

Continued from opposite page
The contract. A motion to the effect that the school be not taken over till all interior work is completed was carried.

School Inspector Bremner's report was before the board, he having been here for six days in January and February. As all teachers except Miss Higginbotham had been previously inspected, he was submitting a report only on the latter. Some classes were over capacity. West Cameron school had almost its maximum attendance, and he proposed the engaging of an additional public school teacher. On motion of Fraser-Greenhalgh, after some discussion, the report was ordered filed for consideration later.

The secretary reported that sufficient had been promised for the \$12,000 bond issue, and after discussion it was decided to accept up to \$15,000 repayable over five years, at 5 per cent. interest payable half yearly.

The principal's report showed attendance down owing to influenza and several teachers absent during February for whom substitutes were engaged.

On motion of Fraser-Greenhalgh, it was decided that work among substitute teachers be equalized, and that a revised list be compiled and supplied to the principal.

The trustees decided to meet the caretakers and re-allot their duties to take effect on the opening of the new building. An order of school supplies was authorized on motion of Greenhalgh-Sharp.

Accounts passed were: Coleman Hardware \$18.45, Coleman Journal \$5.75, Bowen's Furniture Store \$360.00, S. Moores \$24.75, Pritchard-Andrews \$3.78, Modern Electric \$5.50, International Co. \$159.80, Excel Builders \$1.50, Coleman Hardware \$22.45, F. Barringham \$4.00, Pattinson's Hardware \$115.54, McGillivray Co. \$59.80. There were also several small sundry accounts and payments to substitute teachers for February authorized.

The meeting adjourned at 10.45 p.m., having sat for three and a quarter hours.

ANCIENT CUSTOM LINGERS ON
Early Church Started Fish Habit that Persists To This Day

Fishermen from the Atlantic to the Pacific are hopeful that the present effort of the Canadian Government to promote the consumption of Canadian fish will result in people eating more fish throughout the week rather than confining this delicacy to Fridays.

Not only the fishing industry, but the medical profession are behind the move to encourage people to eat more fish throughout the week. Many medical columnists of newspapers have gone on record as to the nutritive and healthful value of fish. With its richness in proteins, minerals and other elements, they say, fish is an important article of diet, as nourishing as other foods and more easily digested.

Usually you will find the real shopping opportunities advertised in The Journal.

fish is a health food

HEALTH... yes... because Canadian Fish and Shellfish are rich in proteins, vitamins, minerals and iodine. But health is not all. There is tastiness... the varied flavour of over sixty different kinds of fish foods. There is economy... the sound thrift of a food that gives you full value in healthful nourishment for every cent you spend.

Make "Any Day a Fish Day". Whether fresh water fish or sea-food... fresh, frozen, canned, smoked, pickled or dried... you can be confident of the prime quality and flavour that have made Canadian fish famous throughout the world.

OTTAWA

Try This Appetizing Recipe
BAKED CREAM SALMON
1 1/2 lb. can Canadian salmon
1 pint milk
Salt and pepper
2 eggs, beaten
2 cups flour
Grand onion
Free the salmon from bones and separate into fillets. Cook the fillets and butter together without browning, and add one cup milk, salt and pepper and enough grand onion to flavour delicately. Place a layer of sauce in a baking dish, then a layer of fish and so on, having sauce on top. Bake to a golden brown and serve with hot.

SARDINES LYONNAISE
Chop together cold boiled potatoes, one small onion, the contents of one tin of Canadian sardines (drained); fry with butter or beef fat until browned and serve with parsley.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain will greatly augment her fire-fighting forces as a precaution against incendiary air attacks, the House of Commons was informed.

The British labor minister decided to appoint a parliamentary committee to study a plan for making paid vacations mandatory for all British salaried workers.

Captain James Mollison plans to fly films of King George VI's coronation in May from London to New York, in a plane to be built specially for him, it was reported in London. Benito Mussolini, as minister of war, has ordered a test mobilization of more than 1,000,000 men within the next few months, an official communique announced.

Windsor, Ont., forwarded to Windsor, England, \$250 toward erection of a memorial to King George V. In the English borough. More than 17,000 citizens contributed to the donation. Assurance of peace is needed for a lasting revival of world trade, Sir George Paish, British economist and international affairs expert, said in an address before the Montreal Canadian club.

Stephen Salter, of Ryde, Isle of Wight, has bought a new pair of boots as he enters on his 102nd year. He walks near his home every day. Once he was builder of the university racing "eights" of Oxford.

Tearing down an old log house on his Brookside farm near London, Ont., Russell Hardie found a coin minted just 100 years ago, a half penny bank note issued by the province of Lower Canada.

A general labor shortage in the United States during 1940 was regarded as "highly probable" by the national industrial conference board, provided business activity continues increasing at a rate equal to that maintained between 1933 and 1936.

Willing To Make Trip

Women Pilots Would Fly Coronation Films To America

A special trans-Atlantic airplane flight is being planned in order to hasten delivery to North American motion-picture theatres of Coronation films.

Negotiations are proceeding with Amy Mollison, Beryl Marikham and other distinguished pilots, to undertake a flight to New York, according to Sir Gordon Craig, General Manager of the company which has been granted exclusive rights to film the coronation on May 12 (British Movietone News).

Copies of the films will also be despatched to North America on the dirigible Hindenburg, scheduled to leave Frankfurt, Germany, late on the day of the coronation. They will be flown to Frankfurt.

Mrs. Mollison and Mrs. Marikham, both of whom have already conquered the North Atlantic by air, have indicated their willingness to attempt the flight, it was stated. Canada will receive its copies of the films from New York by fast service.

Took No Chances

Officers in San Antonio, Texas, found a mysterious bottle containing a yellowish fluid, the chemistry being glyceric. Glyceric, Capt. Cliff Ranzel, explosives expert, carried it 20 miles into the country and set it on a rock. Retiring a safe distance, he shattered the bottle with a shot. Further examination revealed the liquid was cough syrup.

On a clear day, an aviator two miles up can see objects 150 miles away.

Formic acid was made, at one time, by distilling red ants.

Unordered Merchandise

No Obligation On The Part Of Recipient To Return To Sender

Few persons have escaped the annoyance of receiving through the mails such articles as ties, socks, handkerchiefs and other merchandise which they have not ordered and had no intention of buying, but which they either pay for, or to the expense of returning or worry about. They need not do any of these things, according to the Toronto Better Business Bureau, which sends out a circular deploring the rudeness of this "racket" and advising the public how it may be disposed of. It seems the names of the victims are taken from telephone directories and the trade is well organized. It evidently succeeds to a profitable extent, or it would not be persisted in.

Now here is the cheering information supplied by the Toronto Better Business Bureau. There is no obligation, it says, to buy the merchandise, neither need it be returned to the sender, even when a stamped addressed container is enclosed. "If a qualified representative of the company calls for payment or to take back the goods, the citizen is quite within his rights in demanding a return charge before turning the merchandise over to the agent," proceeds the statement. But the recipient of such goods is not entitled to appropriate them to his own use. He must, of course, "hold them for a reasonable length of time."

The co-operation of the public would soon put an end to the nuisance, which is so detrimental to legitimate business. It is an impertinence to force unwanted goods on an individual in this way and there is already so much literature of an importunate nature coming through the mails, that it is distressing to contemplate the growth of this movement by which an attempt is made to disrupt the business of the stores and the ordinary channels of trading. It can be immediately seen that the consequences of accepting such a method would be highly detrimental to the welfare of the community—Hamilton Spectator.

New Scientific Discoveries

Mass Production Of Shoes Threat

Elimination of stitches in broad, improvement of mass-production shoes that really fit and dental fillings that last, are among the new scientific discoveries described in the annual report of the department of scientific and industrial research in Britain.

The manner in which the quality of pork and bacon is linked with the growth and diet of pigs is also being studied. It has been found a rapid walk of a quarter of a mile makes the pigs' tissues more alkaline and this has been found of importance in dry silt curing.

Through a process of gas storage in an atmosphere containing oxygen and carbon dioxide, the luscious William pear, which remains in an eating-ripe condition only a few hours, can now be held in a marketable condition for weeks.

The Flour Millers' Research Association reports that what the housewife usually calls "staling" is due, as a rule, to poor keeping qualities of the bread. Investigations have shown bread made in the best possible way from the best flour will keep for 10 to 12 days.

Will Likely Be Smokeless

New Town Being Planned On Outskirts Of Liverpool

If present plans are carried out a new town to rise on the outskirts of Liverpool, England, will be free of smoke. It is to have 5,000 houses, built at a cost of more than \$5,000,000, and sites are to be left for three churches, a moving picture theatre, seven schools, two shopping centres, and a playground. It is proposed that the houses shall be electrically heated so that there will be no smoke to interfere with the air-dome near at hand.

Enjoying Privacy

Colonel and Mrs. Lindbergh have completed their second year in England as refugees from the American tabloid and camera world. They have found the privilege of having private lives, an experience no longer allowed in America, quite enjoyable, says the New York Sun.

The government of Northern Ireland has guaranteed \$1,000,000 toward the cost of constructing and equipping the new aircraft factory at Belfast.

A "cast" coin is made by pouring molten metal between two molds; a "struck" coin is stamped out of a blank of gold, silver, nickel or copper bronze. 2192

Canada's Radium Industry

Is Now Established On A Regular Production Basis

Discovery of important deposits of pitchblende, the chief commercial ore of radium, associated with rich silver ore was made at Great Bear Lake, Northwest Territories, in 1930, but it was not until the latter part of 1936 that development and research had reached a point at which it could be stated with assurance that radium as a Canadian industry was established on a regular production basis. To obtain this status much progress had first to be made in four separate fields: mining, transportation, refining and marketing.

In 1931, 20 tons of high-grade material from Great Bear Lake were shipped to the Mines Branch Laboratories for experimental purposes, and the results obtained in the treatment of this trial shipment were so successful that a commercial plant for the production of radium salts was established at Port Hope, Ontario.

Now the mine at Great Bear Lake and the refinery at Port Hope, more than 3,000 miles apart, the task of bringing the ore from the mine to the refinery presented a difficult situation, especially as the mine is located 1,450 miles beyond the end of the railway line. By means of the navigable waters of the Mackenzie River system and efficient and economical air service it is now possible to freight concentrates out and equipment in between the railroad at Waterways, in Northern Alberta, to the dock only a few feet from the mine-shaft.

By October, 1936, Canada's radium production reached two grams monthly for the first time and on November 16 production of the first ounce (28 grams) was completed.

Futility Of Gas Masks

Scientists Make Tests Of Anti-Gas Precautions

A group of skeptical Cambridge scientists have splashed the first cold water on Britain's new enthusiasm for anti-gas and anti-air raid precautions.

Scuffling at patriots who pass around gas masks at tea parties, the scientists published a book on experiments they conducted to test the home office's suggested safeguards.

They declare:

1. An average person could remain alive in the ordinary "gas-proof" chamber only about three hours.
2. If the room were made "gas-tight" it would be too small to live in for 12 hours.

The gas mask will give only a limited amount of protection—and that only to healthy adults with cool heads.

The cost of making buildings impervious by incendiary bombs is prohibitive.

The publishing scientists also censured the government's plan to protect children, containing the "gas-proof" baby carriage has the same limitations as the "gas-proof" room.

The "gas-proof" room suggestion by the home office was tested by two volunteer debunkers. They released deadly carbon monoxide in a "gas-proof" room and found the fumes leaked out so fast they did no harm. Hence, they figured, gas fumes would leak in just as fast.

Smoking cayenne pepper in a closed garage helped challenge the infallibility of gas masks. A masked volunteer coughed when he stood within a foot of the smoking pepper.

A crude experimental bomb was burst to burn through a layer of sand and a thick table in 30 seconds.

Doctors Are Puzzled

Strange Case At Worthing, England, Is Something New

A ten-year-old boy, strong and healthy, walks daily to school at Worthing, England.

He is intelligent, able to read and write well.

And the moment he arrives at school he is unable to talk, read or write.

Doctors are puzzled. They have never before heard of such a case. For certain reasons the boy's name has been kept secret.

So interesting is his case that Worthing Town Council has made a grant of £150 to help in the search for a cure.

One theory is that early in his life the boy received a shock which was responsible for this nervous disease.

An important point to remember is that it is not for want of trying that the child is unable—when he arrives at school—to talk, read, or write.

It has been estimated that World War pensions will last at least 100 years. 2192

ACTS TWO WAYS AT ONCE

Too Much Visiting

Some Authorities Think Hospital Patients Not Kept Quiet Enough

Some authorities on the subject of treating the ill are of the opinion that there is too much visiting permitted by hospitals. Some individuals cannot restrain their curiosity when a friend is removed to the hospital. The occasion is made a sort of gala one for an orgy of visiting and many a patient has suffered from the excitement and nervous tension caused by seeing and trying to talk to relatives and friends while suffering from a malady that demands hospital treatment.

In most cases of illness, quiet and respite from exertion is requisite to recovery. Where an excess of visiting is permitted, no such outcome is possible. It is surprising that more thought concerning that factor is not given by hospital authorities, doctors and nurses—Sarnia Canadian Observer.

Suicides In Tokio

Sleekers Appeared To Be Principal Cause With Poverty Second

Men outnumbered women almost two to one in Tokio's 2,881 suicides last year, according to official statistics made public. The number was an increase of 266 over 1935.

Principal causes for the suicides as tabulated by officials were: 915, sickness; 338, poverty; 344, love affairs; 260, guilty conscience; 241, "brooding over one thing" and 217, domestic troubles.

KIDNED? CUTE PANTIE-FROCK EVER SO EASY TO MAKE!

By Anne Adams

Buttoned up-to-the-neck in chic is this adorable Anne Adams frock, to tell the story, for it is up to the pattern 4170. And the best start neck in flattery as any young Miss from Two-to-Eight will adore this practical placed dress with the clear directions for easy making! See the novel yoke, joined so cleverly to the flared panel, and don't overlook the smart choice of purled or dared sleeves. You'll like both versions made up in colorful cottons such as durable checked gingham, flower-scattered percale, dainty dimity or cheery calico.

Pattern 4170 is available in sizes 2, 4, 6 and 8. Size 6 takes 2½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly size, name, address and style number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper, Union 170 McDermott Ave. E., Winnipeg.

SUNDAY SCHOOL LESSON

MARCH 7

LIFE HERE AND HEREAFTER THROUGH CHRIST

Golden text: I am the way, and the truth, and the life: no one cometh unto the Father, but by me. John 14:6.

Lesson: John 14:1-15:27.

Devotional Reading: Ephesians 3:14-21.

Explanations And Comments

Christ the Consoler, verse 1. The disciples were a "sorrowful little band" facing an hour of darkness that they could not understand,—their hearts failed them as they approached the last crisis in their master's life. "Let not your heart be troubled," let not trouble have dominion over you, lovingly Jesus comforted them: "believe in God, believe also in me." It was faith in the Father and the Son who would uphold the disciples in that terrible time.

Here lies the secret of an untroubled heart, in the midst of troubled circumstances—faith in a living, loving God and Savior. Not a nominal faith in the existence of God, but an active, overmastering belief in His goodness and wisdom and in His overruling all things for good. Will keep the heart from despair in times of storm and stress.

Christ's Words about Heaven, verses 2 and 3. In His Father's house are many mansions. Our word mansion meant originally a place of shelter. If there are many mansions in Heaven, the translation abiding places.

It was not you who I would have told you (that your hope might not be in vain).

"Faith, Hope and Love were questioned which they thought of future glory which religion taught; Now Faith believed it to be firmly true, And Hope expected so to find it, too; Love answered, smiling with unconscious glow, 'Believe? Expect? I know it to be true.' John Wesley.

"He that hath seen me hath seen the Father," Jesus thus solemnly affirmed. "My words and works are the Father's." Believe that I and the Father are one because of my words alone, but if you cannot do this, believe me because of my life and words, which I have given to the world. Jesus Christ is seen to be in the three years of his recorded life, the Spirit of God is in the history of the human race.

Girl Is Marine Engineer

Scottish Girl Likes Work Even If

Charlotte Wilson, 17 years of age, of St. Andrews, Scotland, has qualified as a marine engineer and has carried out the traditions of her family by going to sea. She is engineer on her father's fishing vessel.

The Kaskadian, who along with her father and grandfather she will sail regularly to the fishing in the bay. She dresses for her work in a blue jersey and overalls. It is her task to start, stop and manoeuvre the ship. She also helps to pull in the nets of each night, but it is a hard life for a girl, but she much prefers it to housework.

Merely An Exchange

Ohio Flood Took Plane And Brought Back Another

The Ohio River flood took Finley Johnson's plane away—but it brought him another just as good. Finley's home is in the Birds Point-Near Madrid floodway. When the basin was inundated his plane started floating around and spreading general havoc, so "I opened the doors, shoved the plane out and saw it float away," he said.

"When I returned to my home I found another plane had floated in through the open doors during the flood."

Want Town Renamed

People Of Washington Town Think Present Name Unsuitable

The populace of Scutegrease, Washington, has gone dignified. Citizens are tired of being "Scutegreases," and, furthermore, they believe the name of their community no longer is accurately descriptive. So they have petitioned county commissioners to rename the town "Delameter." The region won its name half a century ago because fast was so scarce households used turnips to grease the frying pans.

We never have been able to understand why a man should wish to become famous. Shortly he dies and either returns to oblivion or continues elsewhere to shrug his shoulders at what the world calls greatness.

The four sharp incisors of the beaver are of utmost importance in this animal's battle for life. Each tooth is so arranged that it meets the tooth of the opposite jaw, and thus is kept ground like an axe edge.

To Alkalize Acid Indigestion Away Fast

People Everywhere Are Adopting This Remarkable "Phillips" Way

The way to gain almost incredibly quick relief from stomach condition arising from overacidity, is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meal or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity, "acid-headaches" from over-indigestion in food or smoking—and nausea are relieved. You feel made over; forget you have a stomach.

Try this Phillips' way if you have any acid stomach aches. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

Also in Tablet Form.

Each tiny tablet is the equivalent of a teaspoonful of the genuine "Phillips" Milk of Magnesia.

MADE IN CANADA

PHILLIPS' MILK OF MAGNESIA

Gardening

Informal planting, say the experts, is the most suitable for the average flower garden. True, it is possible with very large gardens and skilled help to do something with straight, dignified rows and borders. But in the average case planting irregularly in clumps will produce the most pleasing effects. Such planting, too, will add an air of spaciousness, giving the whole together with straight lines the appearance of much larger affairs.

Where at all possible there should be a bit of lawn in the garden with an irregularly shaped bed of flowers around the edges and, possibly, groups of shrubs and trees. Scattering of harsh, straight lines about the house and drives with clumps of flowers and shrubs and an occasional trailing vine over verandas or garages will bring the whole thing together with straight lines the appearance of being part of the landscape rather than some rigid affair sticking out of the earth.

Vegetables, on the other hand, should be planted in straight rows. But here, too, a little planning will help. There are a great many new varieties now available in Canada and by the liberal use of some of these new things, and by adopting the rule to make at least three sowings of each variety a week or ten days apart, production can be materially increased. The big advantage of the vegetable garden right at the door is freshness, but to get full value in this respect it is important to have the garden right at the door frequently. Therefore, the modern gardener instead of planting all his peas, lettuce, or carrots on the same day, puts some in the first week and some a little later.

Earlier Opening Date

Vessels May Use Hudson Bay Route From August Fifth

The Hudson Bay route to Churchill, Man., will be opened Aug. 5, 1941 year compared with Aug. 10 last year. The closing date without surcharge on insurance will be extended from Oct. 7 to Oct. 10. This was indicated in a reply tabled in the house to a question asked by W. A. Tucker (Lib., Rosthern).

The opening date will be subject to provision that no vessel may pass Cape Chidley between Aug. 5 and Aug. 10 until advised by pilot ship N. B. McLean that it is safe to do so. Vessels may use the route between Oct. 11 and 15 by paying a 25 per cent. insurance surcharge.

The reply explained the insurance rate on cargoes was a matter of competition. Quotes on ships using the Hudson Bay route to Churchill had been reduced annually from 1930 to 1936 by strong representations from the Dominion government to the imperial shipping committee. The 1936 rates were approximately 11½ per cent. above the St. Lawrence route. The government would continue to press for lower Hudson Bay rates, the ministry replied.

Bullet-Proof Glass

Bullet-proof glass, costing \$2,000 for each coach, is being fitted in all first class coaches on the transcontinental line running from Muklen to Antung. This policy has been adopted because of the many cases of shooting at passengers on this line.

Lunch Served. 6 Good Prizes

ADMISSION 35c

At a meeting on Sunday morning in the council chamber the following were appointed: W. S. Purvis, president; J. L. Lonsbury, vice-president; R. Steurburt, W. Martland, R. Davidson, H. Turner, H. T. Halliwell, R. F. Barnes.

Honorary members in St. Alban's Women's guild would be very much appreciated. Anyone desiring to become a member, kindly notify Mrs. W. Borrowes. The fee is one dollar. This was decided on at a meeting of the Guild in the parish hall on Tuesday evening.

As an instance of how people are interested in local news after moving from here, John Marconi was met on his way to the post office with several copies of The Journal which he was mailing to his sister at Innisfail to keep her informed on Coleman activities.

The town assessment is almost completed, states C. W. May, assessor, and he thanks householders for their courtesy and co-operation. Weather conditions caused many delays, besides sickness in many homes held up the work. He hopes to have the local work completed by Saturday, after which the list has to be revised and thoroughly gone over. When this is completed, the new assessment will be available for inspection, of which due notice will be given.

BUSINESS Property: 50 feet frontage Main street, warehouse at rear, steam heated, apartments above bring \$54 monthly. Ground floor suitable for mercantile retail stores. Enquiries—Bels, Journal, Coleman.

Friday, March 5, holy communion 10 a.m., evensong 7.30 p.m.

Premier Aberhart's policies, if allowed to go on, would make of Alberta people slaves to the government, destroying personal liberty initiative and

the privileges and sacred rights of Democracy which have been attained through centuries of struggle by the common people. No matter how he may try and disguise his motives, Aberhart's way is in his opinion the only way. Contracts are to be ruthlessly broken, criticism swept aside and people treated as mere vessels. Was ever religion put to such base uses as in the weekly broadcasts with vaudeville debates between the premier and a subjective "stooge".
